DETAILED ACTION

Response to Arguments

1. Applicant's response to the last Office Action, filed 6/10/2010, has been entered and made of record.
2. Applicant has amended claims 1, 7, 11, 13, 14, 18 and 19. Claims 1-19 are currently pending.
3. Applicant's arguments, in the amendment filed 8/4/2010, with respect to the rejections of claims 1-19 under 35 U.S.C. 103 (a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
4. After reviewing the remarks made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The combination of cited references Nagaoka et al (JP 2002-005656) and Watanabe et al (US 7,620,237, do not teach or suggest the features of claim or the newly added features. No other found prior art of record teaches or fairly suggests the combination of claimed elements. None teaches :

“ a controller operatively coupled to the memory and configured to determine from the first image taken by the single camera at the first time the position of the object and a first pitch angle of the vehicle relative to a y-coordinate in a horizontal direction is zero, and to determine from the second image taken by the same single camera whether a second pitch angle of the vehicle relative to the y-coordinate in the horizontal direction at the second time is zero, and to determine the position of the object in the second image based on the position of the object in the first image if the second pitch angle is not zero”.

The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
